## RATE THIS CHALLENGE

Complete the countingSort function.

countingSort has the following parameter:

int arr[n]: an array of integers Returns Nothing. Print the sorted array with each element separated by a space.

### Input Format

The first line contains an integer  $n$ , the number of elements in the array. The second line contains  $n$  space-separated integers. 10 11 3 2 1 4 5 6 4 3

### Constraints

$1 \leq n \leq 100000$   $0 \leq arr[i] < 100$

### Output Format

1 1 1 2 3 3 4 4 5 6

Java 15

```
1 import java.util.Scanner;
2
3 public class Solution {
4
5     public static void countingSort(int[] arr) {
6         int[] count = new int[100];
7
8         for (int num : arr) {
9             count[num]++;
10        }
11
12        StringBuilder sb = new StringBuilder();
13        for (int i = 0; i < 100; i++) {
14            while (count[i] > 0) {
15                sb.append(i).append(" ");
16                count[i]--;
17            }
18        }
19
20        System.out.println(sb.toString().trim());
21    }
22
23    public static void main(String[] args) {
```
